Σ = 3 × 10^20 cm^−2
Σ = 10^21 cm^−2
Σ = 3 × 10^21 cm^−2
Transmitted fraction exp(−σΣ(n̂))
Direction of incidence cos i
plane-parallel layer
average (adopted)
sphere
shortest path, Σ_A = Σ_min
Attenuating column Σ_A (cm^−2) at mid-depth
Surface density Σ of the line of sight (cm^−2)
